

Geneveve Vaginal Rejuvenation

"The Geneveve treatment stimulates the body's own renewal response to gradually restore healthy collagen and to give soft tissue a youthful tone and resiliency. No magic - just safe, effective and comfortable gentle heating and surface cooling..."

"Geneveve is a treatment that uses gentle deep heating and surface cooling to stimulate the body's natural collagen formation process. It is a comfortable, single-session, 30-minute treatment. Geneveve does not require local or topical anesthesia or analgesics and is performed by a trained healthcare professional in an outpatient setting." -geneveve.com
